Who's In the Audience Today?

Deck 2 p1

Some of my attendees

Deck 2 p2

Alex the Architect Antelope

May be data architect or app architect

Has a team of 5+ developers

Focused on 1 application, 1 database

Possibly doing Software-as-a-Service,
but each client is in their own database

Probably attends this class

Deck 2 p3

Alex the Architect asks...

Can I get by without hiring a full time DBA?

Does the cloud DB work well with .NET?

Can we easily add performance capacity?

Do I need to worry about running out of space?

Deck 2 p4

Billie the Small Business Bird

Manages systems for a small business

3-4 SQL Servers, a few dozen databases

Most of the databases are third party

Has 1-2 sysadmins, but no full time DBA

Doesn't attend this – but their consultant does

Deck 2 p5

Billie the Small Biz Bird asks

Can we get a cloud database that all of my third party vendors will accept?

Can we set it up and forget it?

Will someone else manage backups for me?

Deck 2 p6

Elliot the Enterprise Elephant

Dozens of SQL Servers

Thousands of databases

Multiple in-house dev teams

A dedicated full time DBA team

Corporation with compliance rules

Attends this, making a strategy

Deck 2 p7

I'll use 'em as
examples today.

Deck 2 p8
